

# SHRAVAN PARTHE

Backend Developer | AI/ML Enthusiast | Mobile App Developer

☎ 7385813010 ✉ shravanparthe@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Mumbai, India

## PROFESSIONAL SUMMARY

Computer Science & Engineering student at the University of Mumbai, pursuing (B.E.) with expected graduation in 2027. Skilled in **Java, Spring Boot, REST APIs, MySQL, Python**, and **AI/ML integration**, with hands-on experience building backend-focused web applications across healthcare, edtech, fintech, and e-commerce domains. Strong foundation in clean architecture, modular design, database-driven development, and API-first systems. Interested in backend development and **GenAI-powered** applications that combine scalable software engineering with intelligent real-world features.

## WORK EXPERIENCE

### Data Science with Gen AI Intern | Internship

Apr 2026 - Present

Innovexis

Remote • Remote

- **Selected** for Innovexis's competitive **Data Science with Generative AI** internship program after shortlisting from multiple applicants
  - Contributed to 3+ real-world data science projects integrating large language models and generative AI pipelines for automated analysis workflows
  - Applied Python, NumPy, Pandas, and Scikit-learn to preprocess and analyze datasets with **10,000+ records** for model training and evaluation
  - **Mastered** 4+ Gen AI workflow components - LLM integration, prompt engineering, RAG pipelines, and applied ML model evaluation
- Technologies / Skills Used :** Python, numpy, pandas, Scikit-learn, fastapi

## EDUCATION

### Vishwaniketan's Institute of Management Entrepreneurship and Engineering Technology (ViMEET)

| Mumbai Jun 2023 - May 2027

CGPA : 7.5 / 10.0

B.E. in Computer Science Engineering (AI & ML)

- Currently pursuing a **B.E. in Computer Science Engineering**, specializing in **AI & ML**

## PROJECTS

### SahayLoan - Micro-Loan Platform | 🐙 Github

Jan 2026 - Present

Developer

- Built a full-stack micro-lending platform (loans up to **₹1,00,000**) with a **Flutter** frontend and a **FastAPI** Python backend serving RESTful APIs
- Engineered an AI credit scoring engine using a **Random Forest** classifier (**76% test accuracy**) trained on 19 features selected from 28 borrower attributes to automate loan eligibility decisions across 3 user roles, replacing manual review
- Integrated **Tesseract OCR** for automated Aadhaar & PAN extraction, reducing manual KYC entry to zero, and configured **Stripe** to handle multi-installment EMI repayments
- Architected a 3-role access system (Borrower, Admin, Loan Provider) with **Firebase Auth** and **Firestore**, supporting real-time loan status updates and push notifications

**Technologies / Tools Used :** Flutter, Dart, FastAPI, Python, Scikit-learn, Firebase, Tesseract OCR, Stripe

### PhonePe Insights | 🐙 Github

Jan 2026 - Mar 2026

Data Engineering & Dashboard Developer

- Engineered an end-to-end fintech analytics platform processing **50,000+** PhonePe transaction records across 36 states using Python, MySQL, and Streamlit
- Constructed an **ETL pipeline** to extract, clean, and load 9 raw transaction datasets into a normalized MySQL schema, reducing query time by structuring 5 relational tables
- Delivered a 10+ chart interactive Streamlit dashboard with Plotly to surface transaction trends, regional breakdowns, and payment category insights
- Integrated Pandas, NumPy, SQLAlchemy, and PyMySQL to support parameterized SQL queries, cutting ad-hoc analysis time across 4 data dimensions

**Technologies / Tools Used :** Streamlit, Data Engineering, Python, SQL, SQLAlchemy, ETL

### SikshaSetu - Rural Education Platform | 🐙 Github

Jan 2025 - Apr 2025

Developer

- Built a full-stack education platform serving students across rural and underserved communities, supporting **3 distinct user roles** and 5+ core academic modules
- Established **RBAC** with Spring Security and **JWT** across 3 roles (Student, Faculty, Admin), securing all API endpoints with token-based auth
- Modeled and optimized a 10+ table relational schema with Spring Data JPA and MySQL, reducing query complexity for core academic data operations
- Integrated **ZEGOCLOUD** video SDK to enable live virtual classrooms, allowing faculty to schedule and host real-time sessions for concurrent student attendance

**Technologies / Tools Used :** React, Spring Security, JWT, Spring Boot, MySQL, Spring Data JPA

## SKILLS

|                                     |                                                                         |
|-------------------------------------|-------------------------------------------------------------------------|
| <b>Databases :</b>                  | MySQL, PostgreSQL, Firebase                                             |
| <b>Frameworks &amp; Libraries :</b> | React, Spring Boot, Flutter, Spring, langchain, FastAPI                 |
| <b>Languages :</b>                  | Hindi, English, Marathi                                                 |
| <b>Programming Languages :</b>      | Java , Python, JavaScript, Dart, SQL                                    |
| <b>Soft Skills :</b>                | Communication, Teamwork, Collaboration, Debugging & Root Cause Analysis |
| <b>Tools &amp; Platforms :</b>      | Docker, GitHub, NumPy , Pandas, Scikit-learn                            |
